

## PROBLEM

We've identified a lack for sophisticated custody and asset servicing solutions for the safeguarding and management of blockchain-based Digital Assets/Securities that successfully cover the need of professional investors. Lacking regulatory frameworks, a secure infrastructure to safely manage their digital assets, and incompatibility between different blockchains technologies, have prevented mainstream adoption and attention from the vast majority of professional investors; There has been little regulation, digital assets have been prone to hacks and scams, and managing one's portfolio typically required navigating multiple wallets and interfaces.

## SOLUTION

**Multi-Asset Productivity:** We enable a full range of financial services for Digital Assets, including custody, staking and trading, all-in-one platform to maximize your returns anytime from anywhere

**Military Grade Security:** We designed the "Warm-Storage" Digital Asset custody technology. Our customer assets are always protected by the highest cryptographic standards while being always accessible

**Highly Intuitive Interface:** We reduce the complexity of our backend infrastructure to the minimal; by combining advanced cryptography with a seamless frontend, to create the ultimate user experience for Digital Asset management

## PRODUCTS

**All-in-one Digital Asset Account – Browser Application**

**Biometric User Authentication (2FA) – Android/iOS**

## SERVICES

**Custody**

Unique Warm-Storage technology supported by the "gold standard" manufacturer of HSMs, secured through biometric 2FA and multi-signature governance

**Staking**

"In-custody" staking; your Digital Assets are permanently protected in your wallet and never leave your account – you can opt out at any time you want

**Trading (coming soon)**

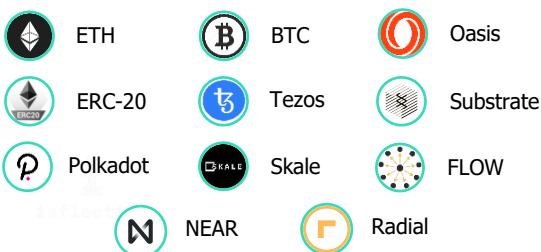

"In-custody" trading, directly from your account. Full access to trading venues, brokers, best-price execution and broad liquidity from a single account

**Finoa is granted a crypto-asset custody license approval as qualified custodian (§ 64y KWG) and is supervised by the German Federal Financial Supervisory Authority**

## ACHEIVEMENTS & OUTCOMES

### Supported Assets

### Selection of Clients
