

# EECF-P

Platform for Energy Efficiency and Carbon Footprint

## VALORISE

A platform to translate the reduction of environmental impacts into value, using blockchain technology certifications

## CREATE AWARENESS

A platform that provides a tool to citizens in order to choose the most sustainable products consciously, using a simple QR code

## REWARD

A platform to reward sustainable choices with a gamification mechanism based on our token on the blockchain technology

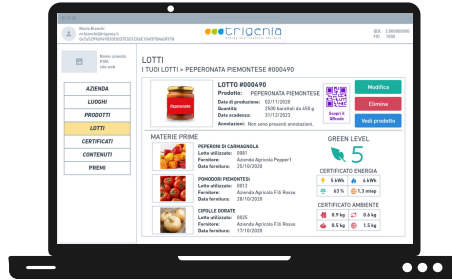

THE MORE VIRTUOUS, THE MORE TOKENS YOU GET!

## OUR PLATFORM IS BASED ON

### QUADRANS BLOCKCHAIN

An open-source public blockchain that hosts our token and the information we certify.

### PRODUCER WEB APP

Interface that allows manufacturers to certify their data on the Quadrans blockchain

### USER APP

App to manage tokens and rewards and to read information from the blockchain directly, using QRcode.

## OUR TEAM

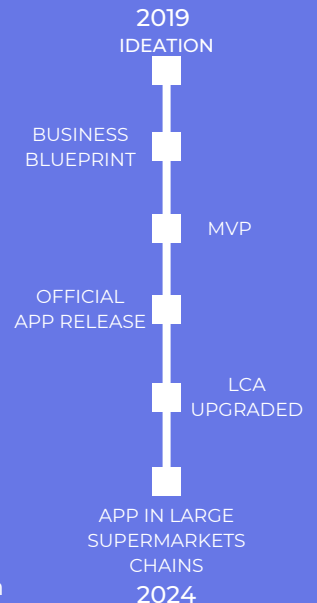

Trigenia is a company working for sustainable innovation.

We are highly specialized in energy, digital and finance fields.

Thanks to our ties with R&D, university and our passion for the green and digital transition we were able to intercept and develop this cross-disciplinary solution.
